Problem

IP Complexity

5 AI-assets Types

AI code, text, visual, audio and game each with different IP considerations.

Workflow

Scattered IP Work

IP analysis and legal steps are handled across disconnected workflows.

Workload

100+ Hours / month

analyzing AI-generated assets, IP risks & preparing legal evidence documentation

IP Exposure

Unprotected Assets

Incomplete IP processes increase copying, disputes and financial loss.

Solution

**Automating AI-Asset IP Legal Processes
& Evidence from Analysis to Protection**

IP Analysis & Planning

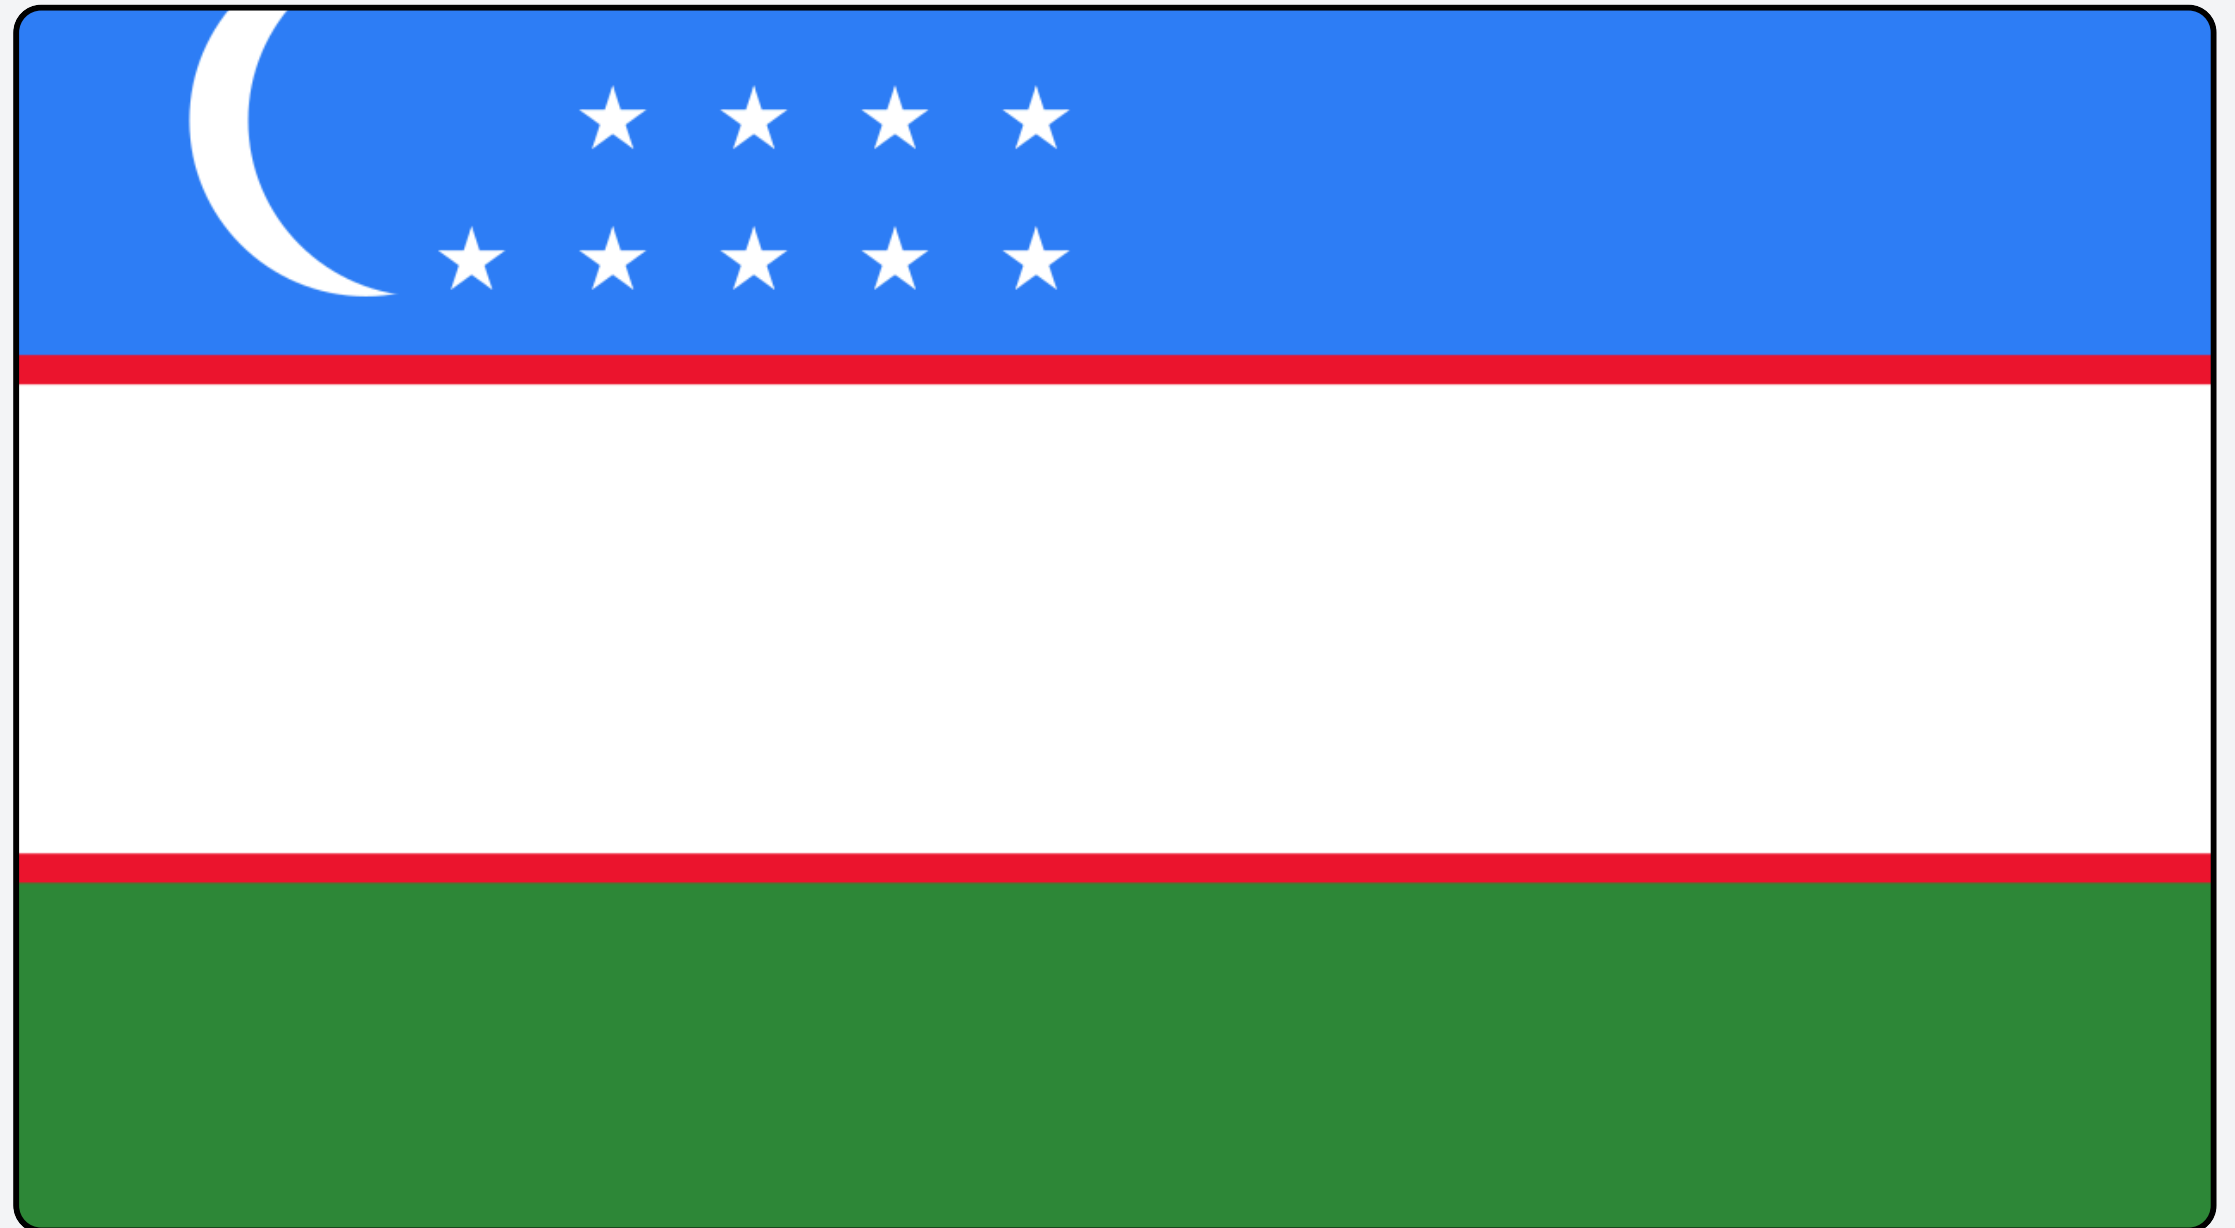

> 90% Faster Workflow

IP Evidence Management

> 60% Lower Cost

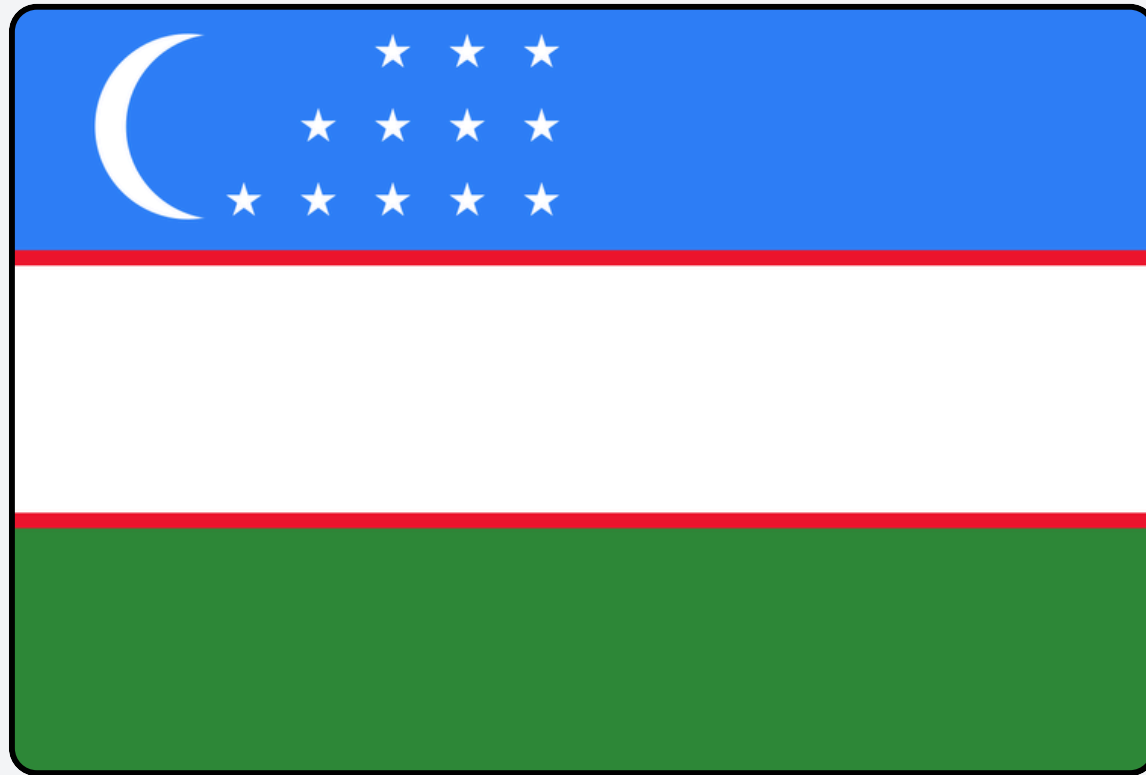

ARIGHT Technology

- > AI Workflow Agents
- > Legal DLM Automation

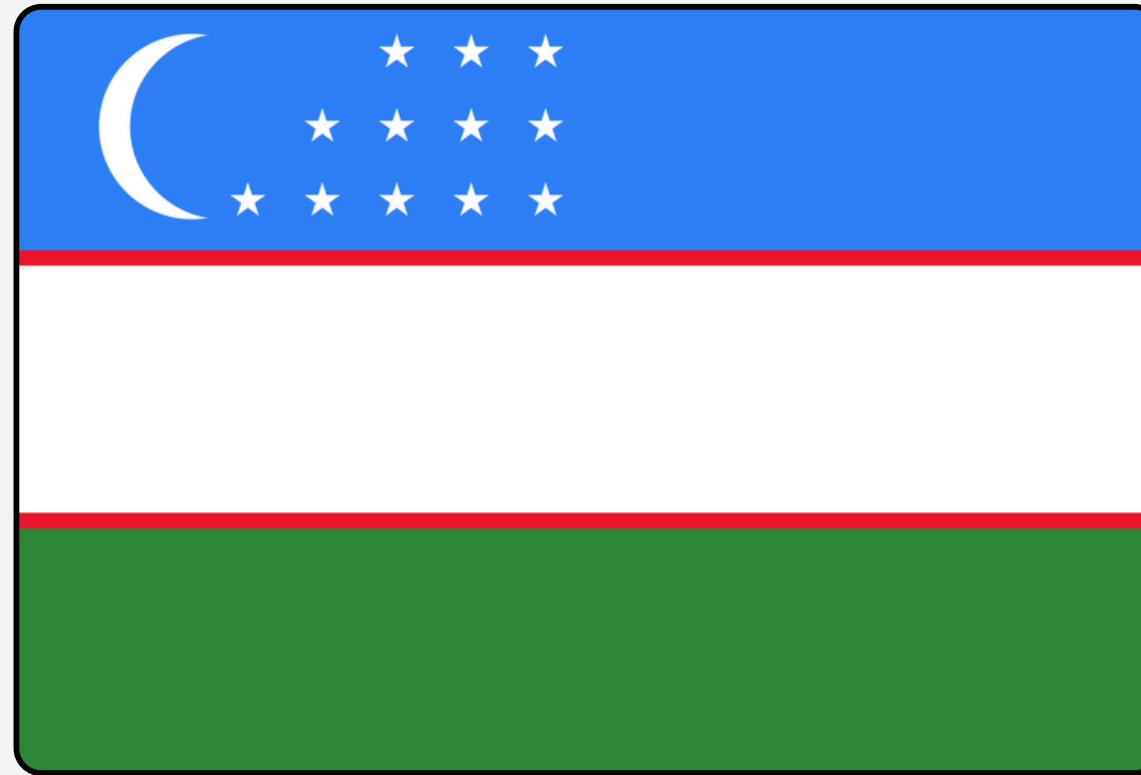

How it works

AI Analysis & IPR Scoring

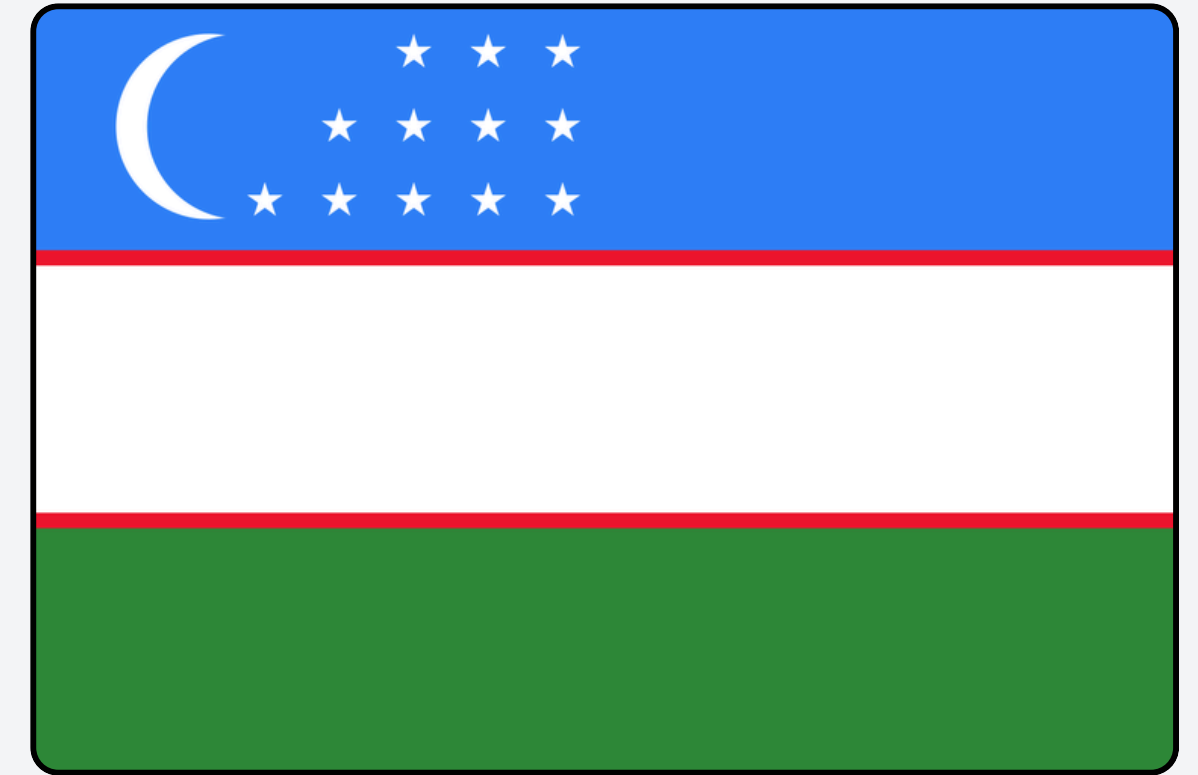

AI analyzes each asset, identifies IP risks & protection opportunities & generates IPR Score

Action Plan & Execution

Generates Action Plan and automates applicable workflows, while assigning user required tasks for manual completion.

Review & Protection

User review & complete required actions, while aOS manages IP protection & legal evidence through the IP PLM.
